EDUCATION

Sri Sivasubramaniya Nadar College Of Engineering , India B.E. in Electronics and Communication Engineering Relevant Coursework: Data Structures, Programming in Python, Computer Networks, Machine Learning, Computer Vision, Communication Network Security, Control Systems, VLSI Design, Information Theory and Coding, Professional Ethics and Management.	11/2020 – 05/2024 CGPA: 8.915/10 (First-Class with Distinction)
Padma Seshadri Bala Bhavan Senior Secondary School , Chennai, India Class 12 (Central Board of Secondary Education)	04/2019 – 04/2020 Percentage: 95.2%

CERTIFICATIONS

AWS Certified AI Practitioner , Amazon Web Services · View on Credly	2026
AWS Certified Cloud Practitioner , Amazon Web Services · View on Credly	2026
Tech for PM , HelloPM · View Certificate	2026

PROFESSIONAL EXPERIENCE

Everstage Technologies , Chennai, India <i>Senior Solution and Customer Experience Specialist</i> - Own end-to-end implementation of sales compensation projects for enterprise clients with 500K+ ARR, managing configurations that impact 1,000+ payees per organisation while serving as the primary liaison for international stakeholders across onboarding, configuration, and ongoing success. - Mine and transform large datasets from CRMs — Salesforce, HubSpot, and Stripe — using SQL and Python to identify compensation logic gaps, surface insights, and directly inform product improvement decisions. - Design and maintain multi-view Apache Superset dashboards tracking key metrics including MRR, CAC, TCV, and quota attainment, enabling leadership to make real-time, data-driven decisions across multiple enterprise accounts. - Act as a cross-functional bridge between product, engineering, and customer success teams to define requirements, streamline reporting workflows, and deliver automated performance metric solutions that reduce manual overhead.	06/2024 – Present
University of Cyprus , Nicosia, Cyprus <i>Research Intern (Onsite)</i> - Contributed to a research project on federated learning and distributed ML for dynamic transmission mode selection in cell-free D2D communication systems. - Simulated a decentralised wireless network using NS-3 and implemented clustering algorithms (K-Means, OPTICS, Spectral, Ward) for node grouping and optimisation. - Developed and trained a synthetic-data neural network model in Python to select transmission modes based on energy efficiency, distance, and signal quality, with real-time topology visualised in NetAnim.	06/2023 – 08/2023

PUBLICATIONS

Improving Security in 5G Vehicular Networks Using ASCON and Machine Learning based NIDS <i>Discover Internet of Things Journal, Springer Nature (Open-Access) · DOI: 10.1007/s43926-025-00226-1</i>	2025

PROJECTS

N8N Workflow Automation – Fathom × Freshdesk Integration - Designed and deployed an end-to-end automation pipeline using N8N that triggers on Fathom call completion, automatically extracting the AI-generated meeting summary and recording link and posting them directly into the corresponding Freshdesk support ticket. - Eliminated manual post-call documentation for the support team, ensuring every customer interaction is automatically logged within Freshdesk with full context — summary and recording — without any manual effort. - Leveraged webhook triggers, REST API integrations (Fathom and Freshdesk APIs), and conditional routing logic to ensure reliable, edge-case-aware data flow between platforms.	2025
AI Voice Agent for L1 Customer Support – Eleven Labs × N8N - Designed and deployed an AI-powered voice agent using Eleven Labs and N8N capable of autonomously handling Tier-1 (L1) customer queries, eliminating the need for human agent involvement on routine questions. - Built and curated a structured knowledge base from scratch, implementing a RAG (Retrieval-Augmented Generation) pipeline to ground the agent's responses in accurate, context-specific product information. - Significantly reduced inbound call volume handled by customer support agents, freeing the team to focus on complex, high-value interactions and improving overall support efficiency.	2025
Enhancing IoV Security using Lightweight Cryptographic Algorithm – ASCON - Built and deployed the ASCON lightweight cryptographic algorithm on Raspberry Pi boards using MQTT protocol to simulate real-time IoT data encryption and decryption. - Simulated real-world cyberattacks (DoS, MITM, password cracking) using Snort and Kali Linux; achieved 99.95% DoS detection accuracy via an ensemble ML voting classifier trained on the CICIDS2017 dataset. - Validated ASCON's efficiency with NPCR = 99.42% and demonstrated superior execution speed and lower CPU usage versus the PRESENT cipher — outcomes that contributed to a peer-reviewed publication in Springer Nature.	10/2023 – 05/2024
Crop Yield Predictor - Collected and analysed agricultural datasets from Kaggle covering soil type, moisture, pH, and crop history; trained and validated a Random Forest model achieving 98% prediction accuracy on validation data. - Enabled data-driven crop selection for farmers and agri-business stakeholders, demonstrating a full product loop from raw data acquisition to actionable user-facing insight.	03/2023 – 05/2023

TECHNICAL SKILLS

Languages & Data:	SQL, Python
Tools & Platforms:	Apache Superset, N8N, Fathom, Freshdesk, Salesforce, HubSpot, Stripe, Supabase, Lovable
Cloud & Infrastructure:	AWS (Certified Cloud Practitioner), Raspberry Pi, MQTT, NS-3
PM & Collaboration:	Stakeholder Management, Agile Workflows, Cross-functional Execution, Requirements Definition, KPI Reporting, Market Research

VOLUNTEERING & LEADERSHIP

- **National Service Scheme (NSS):** Headed a campus-wide health and hygiene awareness campaign impacting 200+ students and local residents; coordinated student volunteers for a large-scale beach cleaning drive.
- **Event Supervisor, INVENTE 6.0 – Junkyard Jumble:** Led a 10-member team to organise a flagship technical event for 150+ participants, overseeing event flow, team coordination, and post-event evaluation.
- **Organising Committee Member, INSTINCTS 2023:** Managed logistics and cross-departmental coordination for SSN University’s annual cultural fest, contributing to theme development and operations across high-footfall domains.
