PROFILE

Two years of B2B SaaS experience bridging cloud infrastructure, product, and cross-functional delivery at Everstage: defined reporting requirements with product, engineering, and customer success teams and delivered automated performance-metric solutions for enterprise accounts above **500K ARR**. Built and deployed an end-to-end **N8N** automation pipeline with **webhooks** and **REST APIs**, and an **IoT security** system running the **ASCON** cryptographic algorithm on **Raspberry Pi** over **MQTT**. AWS certified across **Machine Learning Engineer**, **AI Practitioner**, and **Cloud Practitioner**, covering cloud infrastructure, managed services, and deployment; **Certified ScrumMaster**. Reading an MSc in Management of Technology and Innovation at NUS and seeking a product management internship.

EDUCATION

National University of Singapore (NUS), Singapore	08/2026 – 12/2027
MSc in Management of Technology and Innovation, College of Design and Engineering	In Progress
Sri Sivasubramaniya Nadar College Of Engineering, India	11/2020 – 05/2024
B.E. in Electronics and Communication Engineering	CGPA: 8.915/10 (First-Class with Distinction)
Relevant Coursework: Data Structures, Programming in Python, Machine Learning, Computer Vision, Computer Networks, Information Theory and Coding, Professional Ethics and Management.	
Padma Seshadri Bala Bhavan Senior Secondary School, Chennai, India	04/2019 – 04/2020
Class 12 (Central Board of Secondary Education)	Percentage: 95.2%

CERTIFICATIONS

AWS Certified Machine Learning Engineer – Associate, Amazon Web Services · View on Credly	2026
AWS Certified AI Practitioner, Amazon Web Services · View on Credly	2026
AWS Certified Cloud Practitioner, Amazon Web Services · View on Credly	2026
Tech for PM, HelloPM · product metrics, A/B testing, product discovery · View Certificate	2026
Certified ScrumMaster® (CSM), Scrum Alliance · Verify Badge	06/2026 – 06/2028

PUBLICATION

Improving Security in 5G Vehicular Networks Using ASCON and Machine Learning based NIDS	2025
Discover Internet of Things Journal, Springer Nature (Open-Access) · DOI: 10.1007/s43926-025-00226-1	

PROFESSIONAL EXPERIENCE

Everstage Technologies, Chennai, India	05/2024 – 06/2026
Senior Solution and Customer Experience Specialist	
- Defined reporting requirements with product, engineering, and customer success teams and delivered automated performance-metric solutions that removed manual reporting overhead. - Owned end-to-end implementation of sales compensation projects for enterprise clients above 500K ARR, running configurations that affected 1,000+ payees per organisation and acting as primary liaison for international stakeholders across onboarding, configuration, and ongoing success. - Queried and transformed large CRM datasets from Salesforce, HubSpot, and Stripe using SQL and Python to identify compensation-logic gaps, surface insights, and inform product improvement decisions. - Designed and maintained multi-view Apache Superset dashboards tracking MRR, CAC, TCV, and quota attainment, giving leadership real-time metrics across multiple enterprise accounts.	
University of Cyprus, Nicosia, Cyprus	06/2023 – 08/2023
Research Intern (Onsite)	
- Contributed to a research project on federated learning and distributed ML for dynamic transmission mode selection in cell-free D2D communication systems. - Simulated a decentralised wireless network in NS-3 and implemented four clustering algorithms (K-Means, OPTICS, Spectral, Ward) for node grouping and optimisation. - Trained a neural network in Python on synthetic data to select transmission modes by energy efficiency, distance, and signal quality, with real-time topology visualised in NetAnim.	

PROJECTS

N8N Workflow Automation – Fathom × Freshdesk Integration · N8N, REST APIs, webhooks	2025
- Built and deployed an end-to-end automation pipeline in N8N that triggers on Fathom call completion, extracts the AI-generated meeting summary and recording link, and posts both into the matching Freshdesk support ticket. - Removed manual post-call documentation for the support team, logging every customer interaction in Freshdesk with full context automatically. - Used webhook triggers, REST API integrations, and conditional routing logic to keep the data flow reliable across edge cases.	
Enhancing IoT Security using ASCON · Raspberry Pi, MQTT, Snort, Kali Linux	10/2023 – 05/2024
- Deployed the ASCON lightweight cryptographic algorithm on Raspberry Pi boards over MQTT to simulate real-time IoT data encryption and decryption. - Simulated DoS, MITM, and password-cracking attacks with Snort and Kali Linux, reaching 99.95% DoS detection accuracy with an ensemble ML voting classifier trained on CICIDS2017, and validated ASCON at NPCR 99.42% against the PRESENT cipher. Outcomes contributed to a peer-reviewed Springer Nature publication.	
AI Voice Agent for L1 Customer Support · Eleven Labs, N8N, RAG	2025
- Built and deployed an AI voice agent on Eleven Labs and N8N that handles Tier-1 customer queries autonomously, removing human agent involvement on routine questions. - Curated a structured knowledge base from scratch and implemented a retrieval-augmented generation (RAG) pipeline to ground	

responses in accurate, product-specific information, cutting inbound call volume handled by support agents.

Crop Yield Predictor · *Python, scikit-learn, Random Forest*

03/2023 – 05/2023

- Collected and analysed agricultural datasets from **Kaggle** covering soil type, moisture, pH, and crop history; trained and validated a **Random Forest** model reaching **98% accuracy** on held-out data.
- Enabled data-driven crop selection for farmers and agri-business stakeholders, covering the full loop from raw data acquisition to an actionable user-facing recommendation.

TECHNICAL SKILLS

- **Cloud & Infrastructure:** AWS (Machine Learning Engineer, AI Practitioner, Cloud Practitioner), **N8N** workflow automation, **REST APIs**, webhooks, Raspberry Pi, MQTT, NS-3
- **Product & Process:** requirements definition, stakeholder management, **Agile and Scrum**, cross-functional delivery, market research
- **Languages & Querying:** **SQL, Python**
- **Analysis & Reporting:** **Apache Superset**, exploratory data analysis, **KPI and metric design**, dashboard automation, cohort and trend analysis, stakeholder reporting
- **Machine Learning:** **scikit-learn, Random Forest**, ensemble voting classifiers, clustering (**K-Means**, **OPTICS**, **Spectral**, **Ward**), **neural networks**, **RAG pipelines**
- **Data Sources & Platforms:** **Salesforce, HubSpot, Stripe, Freshdesk, Supabase**

VOLUNTEERING

- **National Service Scheme (NSS):** Headed a campus-wide health and hygiene awareness campaign impacting **200+ students** and local residents; coordinated student volunteers for a large-scale beach cleaning drive.

LEADERSHIP

- **Event Supervisor, INVENTE 6.0 – Junkyard Jumble:** Led a **10-member team** to organise a flagship technical event for **150+ participants**, overseeing event flow, team coordination, and post-event evaluation.
- **Organising Committee Member, INSTINCTS 2023:** Managed logistics and cross-departmental coordination for SSN's annual cultural fest, contributing to theme development and operations across high-footfall domains.
