

SAI ESHWAR

GenAI Enthusiast • Cloud Engineering • Data-Driven Analysis
Singapore • +65 8525 0392 • seshwarsai@gmail.com • LinkedIn • Portfolio
Availability: Jan 2027 – Aug 2027

EDUCATION

National University of Singapore (NUS), Singapore	08/2026 – 12/2027
MSc in Management of Technology and Innovation (Specialization: Product Management and Digital Strategy), College of Design and Engineering	In Progress
Relevant Coursework: Management of Technological Innovation, Intellectual Property Management, Marketing of Technological Products, Business Finance in Tech Industry	
Sri Sivasubramaniya Nadar College Of Engineering, India	11/2020 – 05/2024
B.E. in Electronics and Communication Engineering	CGPA: 8.915/10 (First-Class with Distinction)
Relevant Coursework: Data Structures, Programming in Python, Machine Learning, Computer Vision, Computer Networks, Information Theory and Coding, Professional Ethics and Management.	

CERTIFICATIONS

AWS Certified Machine Learning Engineer – Associate, Amazon Web Services · View on Credly	2026
AWS Certified AI Practitioner, Amazon Web Services · View on Credly	2026
AWS Certified Cloud Practitioner, Amazon Web Services · View on Credly	2026
Tech for PM, HelloPM · product metrics, A/B testing, product discovery · View Certificate	2026
Certified ScrumMaster® (CSM), Scrum Alliance · Agile & Scrum · Verify Badge	06/2026 – 06/2028

PUBLICATIONS

Improving Security in 5G Vehicular Networks Using ASCON and Machine Learning based NIDS	2025
Discover Internet of Things Journal, Springer Nature · DOI: 10.1007/s43926-025-00226-1	
Quantum-Resistant Microelectronic Cryptography for Securing Vehicular Networks	2026
Scopus Index, Pleiades Publishing, Springer Nature (Open-Access) · DOI: Link to pub	

PROFESSIONAL EXPERIENCE

Everstage Technologies (B2B Enterprise SaaS), Chennai, India	05/2024 – 06/2026
Senior Solution and Data Analyst	
- Acted as the cross-functional bridge between product, engineering, and customer success to translate business problems from enterprise stakeholders into concrete requirements with respect to eligibility criteria, tiering, payout sequencing, number of payees etc. - Owned end-to-end implementation and project delivery of sales-compensation configuration for enterprise clients above 500K ARR, running rules that affected 1,000+ payees per organisation. - Acted as primary point of contact for international stakeholders, mainly Sales Comp Admins, to understand business requirements and calculations in MS Excel VBA and translate them into the product. - Analysed and transformed large CRM datasets from Salesforce, HubSpot, and Stripe using SQL and Python to identify compensation-logic gaps and risk points, converting unstructured issues into concrete root causes and product-improvement insights for the roadmap. - Designed and maintained multi-view Apache Superset dashboards tracking KPIs such as MRR, CAC, TCV, and quota attainment. - Drafted SOP documents that should be used for implementing comp structures inside the product using Confluence.	
University of Cyprus, Nicosia, Cyprus	06/2023 – 08/2023
Research Intern (Onsite)	
- Contributed to a research project on federated learning and distributed ML for dynamic transmission mode selection in cell-free D2D communication systems. - Simulated a decentralized wireless network using ns-3 and implemented clustering algorithms (K-Means, OPTICS, Spectral, Ward) for node grouping and optimization. - Developed and trained a synthetic-data-based neural network model using Python to select transmission modes based on energy efficiency, distance, and signal quality. - Evaluated performance through metrics like sum rate, spectral efficiency, and resource utilization; visualized real-time simulation in NetAnim.	

PROJECTS · sai-eshwar-portfolio.vercel.app

Product Management Job Simulation · *Forage*

2026

- Completed a job simulation where I developed an understanding of key performance indicators and selected the most appropriate KPIs for assessing business questions related to a strategy RPG mobile game.
- Demonstrated my ability to prioritize player insights for development, marketing, and senior leadership stakeholders.
- Created a detailed project plan that broke the development of a data-driven stakeholder presentation into clear, actionable steps.

Enhancing IoV Security using ASCON · *Raspberry Pi, MQTT, Snort, Kali Linux*

10/2023 – 05/2024

- Deployed the **ASCON** lightweight cryptographic algorithm on **Raspberry Pi** boards over **MQTT**, then simulated DoS, MITM, and password-cracking attacks with **Snort/Kali Linux** against the live system to generate real adversarial traffic, and trained an **ensemble ML voting classifier** on **CICIDS2017** reaching **99.95% DoS-detection accuracy**.
- Provided hands-on exposure to building and evaluating detection systems under adversarial, real-time conditions. Outcomes contributed to a peer-reviewed **Springer Nature** publication.

AI Voice Agent for L1 Customer Support Team (Everstage account) · *Eleven Labs, N8N, RAG*

2025

- Built and deployed an **AI voice agent** on **Eleven Labs** and **N8N** that autonomously triages and resolves **Tier-1** customer queries, grounded in a knowledge base curated from scratch through a **retrieval-augmented generation (RAG)** pipeline, cutting the volume of routine queries reaching human agents, the same processing-efficiency and workload problem this role addresses for human moderators.

N8N Workflow Automation – Fathom × Freshdesk Integration (Everstage account) · *N8N, REST APIs, webhooks*

2025

- Built and deployed an end-to-end automation pipeline in **N8N** that triggers on **Fathom** call completion, extracts the AI-generated meeting summary and recording link, and posts both into the matching **Freshdesk** ticket, using webhook triggers, **REST API** integrations, and conditional routing logic, the same task-routing pattern that underlies allocation rules in a review queue, to keep the flow reliable across edge cases.

Personal AI Operating System · *Claude Code, multi-agent orchestration, persistent memory*

2026

- Built and run a personal **AI operating system** on **Claude Code**, VS Code, and Obsidian that included slash-command skills, a cross-session project registry/memory layer, and a **multi-agent orchestration pattern**.
- Acted as a second brain and helped boost my overall productivity.

Smartphone Addiction Prediction · *Kaggle Playground, LightGBM, XGBoost, CatBoost, Optuna*

2026

- Built a gradient-boosted ensemble (**LightGBM**, **XGBoost**, **CatBoost**) on a Kaggle dataset of **691K** training rows and **296K** test rows to predict the probability a person is addicted to their smartphone, engineering ratio and delta features.
- Cut variance by retraining the winning **LightGBM** and **XGBoost** configs across **3 random seeds** each, averaged the runs, and blended them with AUC-optimised weights from **scipy.optimize** (about 75% XGBoost, 25% LightGBM), reaching **0.9652** out-of-fold AUC and **0.96635** on the public leaderboard.

TECHNICAL SKILLS

- **AI/ML & Detection Systems:** ensemble ML voting classifiers, adversarial-attack simulation (**Snort**, **Kali Linux**), CICIDS2017, published NIDS research, detection-system limitations under real-time/adversarial conditions
- **AI/LLM Engineering:** **Claude API**, **Claude Code**, prompt engineering, structured-output/JSON pipelines, **RAG**, agentic workflow design, multi-agent orchestration, **Lovable**, **Supabase** Edge Functions
- **Product & Process:** requirements definition, feature prioritisation frameworks, stakeholder management, **Agile and Scrum**, cross-functional delivery, SOP-style specification writing
- **Cloud & Infrastructure** (AWS Certified: ML Engineer Associate, AI Practitioner, Cloud Practitioner): **N8N** workflow automation, **REST APIs**, webhooks; exam-level grounding in containerised deployment (**Kubernetes/EKS**), distributed data processing (**Apache Spark** via EMR, Glue), streaming pipelines (**Apache Kafka**-compatible MSK, Kinesis), IAM, model-monitoring concepts
- **Languages & Querying:** **SQL**, **Python**
- **Analysis & Reporting:** **Apache Superset**, exploratory data analysis, **KPI and metric-framework design**, dashboard automation, stakeholder reporting
- **Machine Learning & Data:** **scikit-learn**, **Random Forest**, ensemble classifiers, clustering (**K-Means**, **OPTICS**, **Spectral**, **Ward**) · **Salesforce**, **HubSpot**, **Stripe**, **Freshdesk**

VOLUNTEERING & LEADERSHIP

- **National Service Scheme (NSS):** Headed a campus-wide health/hygiene awareness campaign impacting **200+ students** and local residents; coordinated volunteers for a beach cleaning drive.
- **Event Supervisor, INVENTE 6.0** and **Organising Committee, INSTINCTS 2023:** Led a **10-member team** for a technical event with **150+ participants**; managed cross-departmental logistics for SSN's annual cultural fest.
- **Project Lead, ISEM Graduate Club:** Currently leading an inter-departmental alumni round-table initiative at NUS.
